

AllergX® Allergy Defense Formula Fact Sheet

- Product:** AllergX® Allergy Defense Formula is an all-natural, non-drowsy tablet shown in clinical studies on 2,500 allergic individuals to lower levels of IgE (Immunoglobulin E) - the key allergen antibody, and allergy symptoms.
- AllergX is a new approach for allergic individuals to deal with allergies *before* their symptoms arise.
- AllergX works by regulating the over-production of IgE which is the real cause of allergy symptoms. High levels of IgE can lead to an overly sensitive release of histamine when exposed to harmless allergens - like pollens, grasses and pet dander. It is the body's reaction to histamine which brings about allergy symptoms such as sneezing, nasal itch, runny nose and nasal congestion. AllergX is the world's only PRE-histamine.
- AllergX is a patented, all-natural, quick-dissolve tablet that is 100% non-drowsy, and does not have the typical side effects of OTC and prescription allergy medications, and decongestants.
- Parent Company:** Exposure Scientific , LLC
- Mission:** Exposure Scientific is dedicated to researching, developing, marketing and licensing consumer healthcare products that are natural, patented, backed by science and disruptive to traditional pharmaceutical approaches.
- Headquarters:** Irvine, CA
- Officers:** Ernest T. Armstrong, CEO
Marty Marion, President
Lyndon Mansfield, MD, Chief Medical Officer, Board Certified Allergist
- Employees:** Ten
- Media Contact:** Propheta Communications
